Sankara Rao Kruthiventi

Senior Software Engineer | OpenText | Angular | Node.js | UI/UX Design | AI

+917972914312 shankar3336@gmail.com linkedin.com/in/shankarkruthiventi/ Bengaluru

Summary

Accomplished **Senior Software Engineer** with **10 years** of experience and expertise in **Angular**, **Node**, **TypeScript**, **UI Engineering,** and **AI Integration**.

- At **OpenText**, I architected a **Unified Management Console** to modernize legacy systems and reusable Angular filtering frameworks that improved system performance by **80%.**
- At **OneTrust**, contributed to a **Microfrontend Architecture** for Incidents and Breaches, resulting in a **40% Time Reduction**.
- At **OakNorth**, I developed reusable banking components that reduced loan processing time by **70%** and improved system efficiency by **40%.**

Skills

Technical Skills

TypeScript | Angular | Nest.js | JavaScript | HTML5 | CSS3 | REST API Integration | AWS | Linux | Unit Testing | E2E | Security | SQL | Node.js | React

Tools

Git | CI/CD | Jira | Gen AI | Agentic AI | RAG | LLMs | Design patterns | OOPS concepts | UI/UX Design | Data Structures & Algorithms |

Work Experience

Senior Software Engineer

Jul 2022 - Present

OpenText

- Architected and developed a **Unified Management Console** using **Node.js** and **Angular**, reducing manual server configuration and operational tasks by **60%**.
- Developed a reusable **Angular** listing grid with search and pagination, reducing admin workload and improving system performance by **80%**.
- Implemented **CI/CD** pipeline with **unit tests**, reducing introduced bugs by **40%** and enhancing feature generation within 6 months.
- Enhanced **Swagger docs** to conform to OpenAPI specs, enabling **API Integration** for AI tools, resolving documentation gaps, and bringing B2B solutions to market standards. Adapted **Authentication** using passkeys **and Authorization** integrated.
- Engineered reusable Angular filtering frameworks for large-scale product development, improving system performance by 80**%**.

Senior Software Engineer

Sep 2021 - Jul 2022

OneTrust

- Spearheaded development of an **Angular** and **Node.js** Incident & Breach micro-frontend app to manage incidents effectively, enhancing system efficiency by **40%**.
- **Facilitated** and collaborated on Agile methodologies and communication across Product, Development, and QA to bridge silos, boosting team efficiency by **20%**.
- Addressed inconsistent coding standards across **3 teams** by implementing **4+ reusable Angular components**, reducing technical debt by **20%** and standardizing practices.
- Redesigned the incident and breach module UI using **Angular** and **UI/UX Design** principles to improve operational efficiency and user satisfaction.

Senior Technology Analyst

Apr 2020 - Sep 2021

OakNorth

- Developed a core banking solution using Angular and React.js, streamlining processes to achieve a **30% increase** in user adoption and **a 40% increase in system efficiency**.
- Developed **reusable common components** for loan top-ups and disbursals, enabling end-to-end workflows for global SMEs and **reducing processing time by 70%**.
- Accelerated project delivery for banking solutions by mentoring junior developers in the financial domain, version control, and code reviews, enhancing productivity by 30%.

Senior Software Engineer

Jun 2018 - Mar 2020

Mindtree

- Developed an **Angular** and **TypeScript** application to guide students through medical university applications, bridging student-university gaps and eliminating paperwork, thereby speeding up the process by **30%**.
- Developed an **Angular** contact application to guide users to the right insurance/banking support specialists, increasing user engagement by **50%**.
- Developed a role-based **Angular** & **Node.js** ed-tech platform to manage academics, improving faculty task completion by **30%**.
- Modernized legacy supply chain application using **Angular** and **TypeScript** within **Agile Methodologies**, reducing PO placement/review time by **30%** to enhance operational efficiency.

Administrator

Mar 2016 - Jun 2018

Wipro

- Automated HR document generation, reducing manual errors by **90%** and accelerating delivery; built a secure pipeline using **TypeScript** and server-side PDF engines to map validated data to encrypted templates, mitigating compliance risks.
- Spearheaded front-end architecture for a marathon app using **Angular**, optimizing real-time race tracking and analytics to handle extreme global registration spikes, resulting in a **25%** processing efficiency improvement and full **web accessibility**.
- Solved **scattered structures** and **hardcoded issues** by engineering a dynamic HTML email templating engine, reducing maintenance overhead by **40%** and ensuring **100%** consistent cross-platform rendering.
- Optimized browser internals for real-time attendance sheets by refactoring backend queries and implementing virtual scrolling, decreasing **loading times by 65%** and ensuring **cross-browser compatibility** and **performance optimization**.

Education

Bachelor of Technology(B.Tech) / Bachelor of Egineering(B.E)

May 2010 - May 2014

SCSVMV University
